To Whom It May Concern:

Essig's Tree & Landscape transformed our backyard this Summer. As part of a project that involved putting in a swimming pool, Brian Essig was indispensable. His involvement began with the earliest design stages of how best to site the pool, and he continued to stay on top of things until the last piece of sod was in place. He was available either by phone, or in person, at each stage of the process.

Brian's crew was a delight to work with. They were friendly and conscientious. The work site was meticulous at the end of each work day.

The results have been more than we hoped for, and we've received no end of compliments from neighbors and friends.

I can recommend Essig's Tree & Landscape highly and with utter confidence. Feel free to contact me should you have any questions.

Sincerely,

 AND
Joel Greenwald, MD
